The Pinnacle and Crescent freestanding canopies and carports offer a versatile year round coverage solution to help you make the most of your garden; shield your vehicles from the summer heat; and provide shelter from the rain, snow, frost and hail in the winter. In autumn they offer ideal protection from falling leaves or debris. Pre-engineered for fast and easy assembly, Homestyle freestanding carports feature ready to use frame components and a sliding patented roofing system. They can normally be installed in a single day by two DIY-savvy people and will give many years of low maintenance shelter and shade, being easily cleaned with hose or rain.

Pinnacle Canopy

This pitched roof freestanding canopy provides an elegant shelter with maximum headroom.

The Pinnacle provides high performance outdoor protection for vehicles, boats, trailers, farm equipment and an endless variety of covering solutions for other garden uses.

The sturdy, durable frame is made from rust resistant, grey powder-coated aluminium and galvanized steel, completed with a virtually unbreakable semi-translucent 'Solar Grey' polycarbonate covering that gives graceful sky light and shading on a sunny day with 99.9% UV protection.

The Pinnacle covers an area of 17 m², can withstand snow loading of up to 125 kg/m² and is wind resistant to 150 kph.

Included within the Pinnacle Canopy kit is the guttering system, sliding roof system and anchoring kit. It is designed to install on concrete flooring, footings, piers, or any level surface and is suitable for domestic use.

The external canopy dimensions are: 501cm length x 338cm width x 278cm height.

The post dimensions are 80mm x 80mm

Crescent Curved Roof Canopy

The soft flowing lines of the curved roof give a clean and contemporary look to this freestanding versatile canopy with a wide, high entrance for easy and safe access.

The sturdy, durable frame is made from rust resistant grey powder-coated aluminium and galvanized steel, completed with a virtually unbreakable clear polycarbonate covering offering UV protection and over 90% light transmission.

The Crescent covers an area of 18.2 m², can withstand snow loading of up to 150 kg/m² and is wind resistant to 150 kph.

Included within the Crescent Canopy kit is the guttering system, sliding roof system and anchoring kit. The Crescent is designed to install on concrete flooring, footings, piers, or any level surface and is suitable for domestic use.

The external canopy dimensions are: 502cm length x 362cm width x 242cm height.

The post dimensions are 80mm x 80mm.
