TRAPGUARD FINGER PROTECTOR

A high quality, resilient blind that prevents fingers entering the cavity formed between the edge of the door and door frame. The blind is mounted in a robust aluminium housing that protects the blind when not in use.

Benefits

- Prevents fingers being trapped in gap between frame and rear edge of door
- Suitable for most standard doors with openings up to 180°
- Can act as a light door closing mechanism
- Provides privacy down hinge side
- Greater longevity, by design
- Product can be cut to size

Doors are an everyday object but potentially dangerous and according to RoSPA there are over 30,000 finger injuries every year.

Teachers, parents, and carers have become increasingly aware of the danger of children trapping their fingers in closing doors and to avoid accidents recent legislation BS7036 Part 4: item 7.1 recommends "the use of a finger protector that either fills the finger trap or minimises the gap so as not to create a finger trap.
