FINGER DEFENDER

Finger Defender is a high quality, resilient blind that will open to maximum 260mm preventing fingers entering the cavity formed between the edge of the door and door frame. The blind is mounted in a robust aluminium housing that protects the blind when not in use.

ADVANTAGES

- Top of the range product
- Prevents fingers being trapped in gap between frame and rear edge of door
- Suitable for Automatic Doors
- Suitable for most standard doors with openings up to 180°
- Acts as a light door closing mechanism
- Extremely durable and maintenance free
- Tested to over 1 million open & closing cycles
- Impact resistant

Doors are an everyday object but potentially dangerous and according to RoSPA there are over 30,000 finger injuries every year.

Teachers, parents, and carers have become increasingly aware of the danger of children trapping their fingers in closing doors and to avoid accidents recent legislation BS7036 Part 4: item 7.1 recommends "the use of a finger defender that either fills the finger trap or minimises the gap so as not to create a finger trap.

Independently tested to over 1 million opening & closing cycles and prevents fingers entering the cavity formed between the door and the frame by means of an inflammable blind, which opens and closes with the action of the door. The robust housing protects the blind when not in use. It has concealed screw fixings and comes complete with end caps for that even neater finish.

An installation sheet is provided with the product.
