Weatherseal Groovers

The T5883 Compact Groover will produce a 2mm wide groove and has a small overall diameter making it suitable for use in small hand routers; it can be used for in-situ grooving and cuts into internal corners leaving a minimum radius to be cleaned by hand. The design of the cutter allows the groove to be positioned against the bottom of the rebate if required.

The RC73WG Weatherseal Groover will produce a 2.7mm wide groove that will suit many types of weather/draught seals which require a 3mm nominal groove.
